

INERTEC GmbH – Company Presentation 2019

Founding

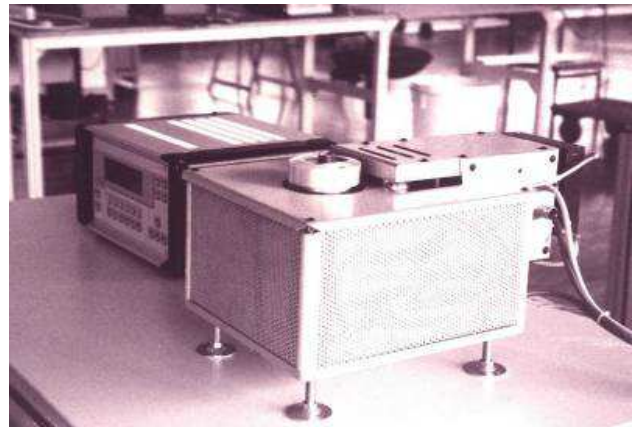

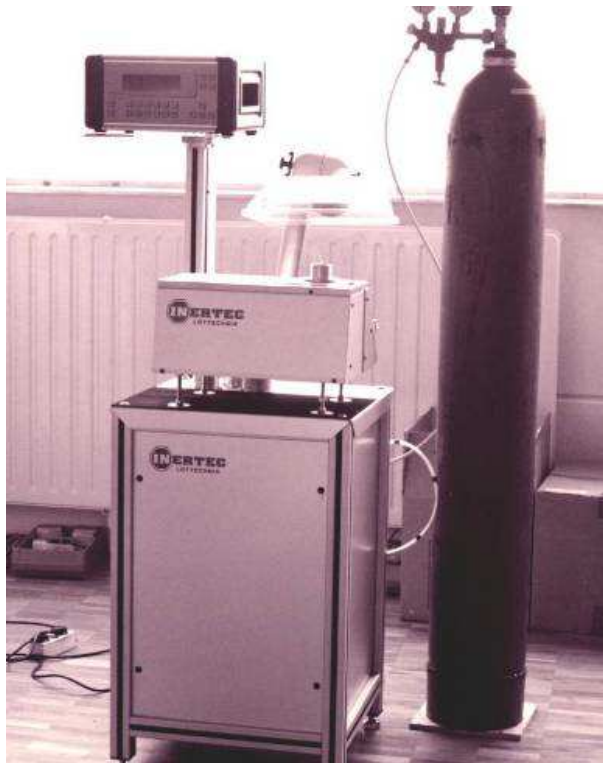

The founder Ernst Hohnerlein was also an original founder of SEHO (Seitz/Hohnerlein). His idea for selective soldering was in the late 80's.

Since 1992 several types of selective soldering technologies have been available from Inertec

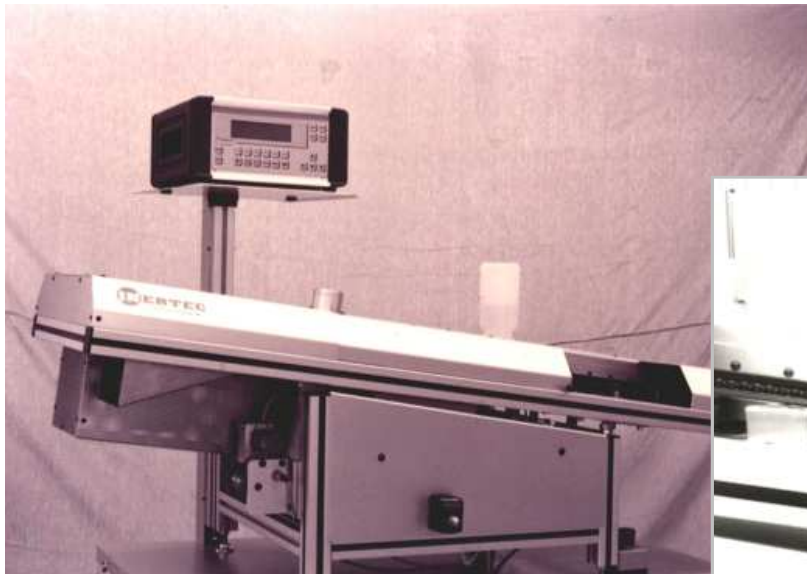

- Mini-wave selective soldering
- High speed stamp soldering (also patented by Inertec)

With over 1300 installed soldering systems, INERTEC is one of the leading companies in this market sector.

Newest equipment like an optical inspection or the test of a customers PCB via an x ray system allow a direct inspection of the PCB right after the test.

The requirement to test different alloys can be handled easily by using exchangeable soldering units.

We provide our customers throughout the world not just with machinery, but also with the necessary process knowledge.
